ACCREDITED FOR HOSPITAL • BLOOD BANK • DIAGNOSTIC LABORATORIES • IMAGING SERVICES

A hospital so state-of-the-art, it's 20/20.

Watching a child smile. The aroma of freshly cooked food. Listening to music. Life seems incomplete when any of your five senses are affected. At Shree Krishna Hospital's speciality clinics for ENT and eye care, every aspect of treatment – from oculoplasty to endoscopy of the nose to cochlear implant surgery – is looked after by our team of experts.

SHREE KRISHNA HOSPITAL

With an experience of over 35 years, Shree Krishna Hospital is the most dependable destination for healthcare. Our comprehensive set-up ensures that you do not have to move from pillar to post for any essential medical care required during treatment. The experienced team of experts and well-trained support staff makes sure you receive care with steadfast dedication and warmth.

EYE CARE:

Comprehensive Eye-check-up : offering a detailed eye screening to locate or rule out if there are problems in context to cataract, glaucoma, damage in retina due to hypertension or diabetes, etc

- **Oculoplasty Clinic:** the clinic offers treatment for various abnormalities of eye lids, tear ducts, orbit, removal of tumours etc.
- **Cornea Clinic:** the clinic offers treatment for various conditions affecting our cornea like corneal blindness, herpes of the eyes, blisters or lesions in cornea, eye trauma, infections, etc through surgical or medical modality.
- **Squint Clinic:** A misalignment of the eyes, inward or outward to be addressed with vision therapy or surgery

ENT CARE:

Neonatal Screening Test: The neonatal or newborn hearing screening test helps to identify babies who have permanent hearing loss as early as possible. This means parents can get the support and advice they need right from the start. SKH is the only place to offer this test in the entire region.

- **Cochlear Implant Surgery:** A cochlear implant is an electronic medical device that replaces the function of the damaged inner ear. It is advisable to get this procedure done in the age of 0 to 3 years, since it helps the child to adjust to the implant and in grasping the sounds and learning language comfortably then it would if the implant is done at a later stage in life.
- **Skull Base Surgery:** to remove cancerous and benign tumours at the base of skull, removal of abnormalities on the underside of the brain, cysts from birth, growths caused by infections, trigeminal neuralgia etc
- **Deafness Treatment:** Helping in finding out the cause of deafness and treating it with medication or surgery (Stapedotomy) as is the individual requirement

PATIENT TESTIMONIALS

I used to have faded vision and constant watering from eyes which was mainly because of age. I got cataract surgery done for both my eyes at Shree Krishna Hospital and now my eye sight is clear. The cleanliness in the hospital is admirable. I and my family members always count on Shree Krishna Hospital, whether the illness is small or serious.

Chimanbhai Prajapati, At. Kavitha, Ta. Borsad

I had problems hearing in both ears since childhood. My parents were unable to realize the seriousness of it until I completely stopped hearing any sound. Before some time I got Stapedectomy at Shree Krishna Hospital and now I have regained my hearing ability. This hospital has complete services ranging from hearing tests to facilities for surgeries. We chose to take treatment here because of the team of doctors who are experts in their fields.
