Cashless Services:

The Centre has tie-ups with major TPAs for cashless services. Benefits of the 'Mukhya Matri Amutam scheme' is available.

The Hospital:

A world away from the chaos of the main cities and surrounded by 100 acres of lush greenery, Shree Krishna Hospital is an ideal environment for rest and recovery.

At Shree Krishna Hospital, we believe that the very core of medicine is care and a helping hand. It's this that leads us to not charge any registration or consultation fee for outdoor consultations and medical advice. Nor do we charge for stay or diet in our general wards. We do not turn away a single emergency case. We even offer substantial discounts in our treatment cost to those living below the poverty line, women and children.

Today, the NABH-accredited Hospital is ranked among Gujarat's most professional healthcare centres, complete with facilities like ICUs, OTs, a Trauma Centre, MRI and CT-Scan Machines, NABL-accredited Labs, and NABH-accredited Blood Bank. In addition to the Cardiac Centre, it also houses a world-class Cancer Centre, with a Linear Accelerator and facilities for Chemotherapy.

A centre with a heart.

Complete cardiac treatment for new borns, children and adults.

Established in the year 2008, the Bhanubhai and Madhuben Patel Cardiac Centre was set up with the promise of extending Shree Krishna Hospital's super-speciality cardiology treatment. To provide patients with state-of-the-art infrastructure and the most efficient, qualified team of experts, all under one roof.

The Cardiac Centre is on par with any cardiac care unit in the world. Like the Hospital, the Bhanubhai and Madhubhai Patel Cardiac Centre consistently strives towards providing quality care with affordability. This is achieved by an efficient team of experts and dedicated support staff, and has helped gain a leadership position amongst the community.

The Centre handles all types of adult and pediatric cardiac thoracic and vascular surgeries, simple and complex. Adult surgeries include CABG, Valve repair and replacement. Pediatric surgeries include Corrective and palliative, TGA, TAPVC, AV Canal defect and Single Ventricle, all conducted with excellent results comparable to any other centre in world. With its specialised treatment facilities, the Centre has treated highly complicated cases, many rejected by multiple other institutions. Today, the Centre has reached out to 25,000 outdoor patients and more than 5,000 indoor patients. From a 2-day old infant to an 88-year old, we've treated them all.

Facilities:

- Well-equipped Operation Theatres with linear air flow, remote-controlled OT tables anesthesia machines, ventilators and monitors
