

Well-wisher's voice

The Shree Krishna Hospital managed by the Charutar Arogya Mandal is doing a great and responsible work towards the marginalized people of our society by providing affordable medical treatment. I hope our society is mature enough to understand that we are one family and should contribute reasonable amount to this Mandal for the welfare of poor and needy patients.

'May lord Krishna guide us to the path of truthfulness'

- Mr. Shivaditya Sen
Anand

We as a society have some responsibility towards people who are not able to deal with their health needs. I choose Mandal to fulfill my responsibilities.

- Shri Sunilbhai V. Motwani
Ahmedabad

Happy to share my experience as a donor to Shree Krishna Hospital that is doing great service towards the poor community and for building a healthy family.

- Shri Ritesh Gohel
Vadodara

Patient gratitude

20-year-old Mr. Harsh Vaghela, from Surat was shattered after getting diagnosed with Giuliani-Barre Syndrome, a rare condition in which immune system attacks the nerves. Being from a poor family who was unable to take care of the expenses, was referred to Shree Krishna hospital. A multi-disciplinary approach was adopted to treat the patient, consisting of doctors from all key verticals. The hospital bore the treatment cost after due socioeconomic evaluation. He and his father went home satisfactorily and thanked the treating team.

'Charutar Arogya Mandal' gratefully acknowledges the support & trust received from all of you. It is with generous support from people like you that has made it possible for us to reach out to less privileged patients and provide them quality treatment with compassion.

From Chairman's Desk

Dear Friends,

With gratitude and joy, we cherished the togetherness of 5 decades, I would like to thank you for your wholehearted association with the Mandal. In the journey so far, together we have been able to treat over 7.5 million patients, ensuring quality healthcare for those who can't otherwise afford it, with an experience as it was always meant to be; humane, rational, efficient and affordable.

It is undeniable to say that with your unconditional and solid support, the Mandal starting with a small nursing school, has added a host of educational institutions serving to the field of medicine over the years, such as Medical College, College of Physiotherapy, Institute of Medical Laboratory Technology and CAM Institute of Allied Health Sciences and Technology. For patient care, its flagship Shree Krishna Hospital serves as Charotar's largest and most well-equipped, NABH accredited 1000 bedded, healthcare facility. In October 2019, Mandal constituted a private University named "Bhaikaka University" as facilitating body for all these institutions. On 28th July we celebrated our golden jubilee and 51st foundation day, observing the journey so far, and way forward. The 4 driving pillars are the key to our mission towards supporting the community are patient care, education, research and public health.

We have grown and spread our wings to serve more & more number of needy patients and extended academic excellence to the budding young professionals, day by day and decade to decade. The journey has been steady and sustainable, we commit our self to continue the same.

Technological advancement and up-gradation is the key to quality healthcare services and it's our constant en-devour to meet the pace with it. In this way we are planning to include PET-SCAN services to our cancer care unit, to extend the holistic treatment under one roof. The facility will not only enable the experts for focused treatment plan but also ease the patients suffering those who require to bear the hassle-full travel to far off cities for precise diagnosis.

Your trust and sustainable support has enabled us to continuously stride in a way to provide quality healthcare services to the under served.

Once again, I thank you all for your trust and support.

- Atul Patel
Chairman
Charutar Arogya Mandal

Vishal Rajibhai Solanki – back to school

Vishal Solanki 11 yrs., a playful class 5th student, from Pandoli village of Petlad Taluka, the elder son of Rajibhai Solanki, a daily farm wager taking care of his family of 4 members. While playing he use to get tired easily and use to get frequent fever episodes. Last when he got fever it lasted more than 15 days and could not get treated by the doctors available locally. He was referred to Shree Krishna Hospital. Initial diagnosis could not get the exact reason of fever thus TB test was conducted and he got diagnosed with tuberculosis meningitis.

He was admitted to PICU and kept on higher antibiotics under the supervision of intensivists and paramedical staff for over 40 days followed by Ventriculo- peritoneal (VP) Shunt surgery. He got discharged with advice to have high protein food and regular physiotherapy exercise under supervision. The family has got a new ray of hope for his future and thanked to all the supporters and team of doctors.

Saved an underweight pre-term neonate

Chandrikaben Padhiyar gave pre-term birth to an underweight baby (1.1 kg) due to some complications. There were very dim chances of survival for the baby who was suffering from birth asphxia and respiratory distress syndrome (RDS). Doctors decided to take charge of newborn's life and he was put on invasive mechanical ventilator for few days. As there were some signs of improvement, the treatment was continued with various mechanical support and the baby final gained weight.

Over 35 days of hospitalisation helped the child to gain about 700 gms of additional weight. On getting a satisfactory response, doctors

suggested to discharge the child with an advice to kangaroo mother care at home. The family thanked the team of doctors and to those who supported in their child's survival.

Saved a mother and her pre-term baby

22 yr old Smita Chauhan was dreaming for her 1st baby to arrive but the sudden pain and pre-mature delivery at 30.2

weeks faded her dreams to misery. She was referred to SKH from one of the maternity centres with deteriorating condition of mother. The baby was underweight with respiratory distress syndrome, bronchopulmonary dysplasia and anemia of pre-maturity. It was very difficult for the poor family to take care off the treatment expenses for mother and longer stay of child.

After 50 days of hospital stay supported by invasive and non-invasive breathing tools the child was discharged on medical advice and guidance to take care of the child at home. Smitaben and her family thanked the Hospital and donors.

Gratitude:

We gratefully acknowledge the contributions of all donors who have been so generous in supporting our mission.
